DETAILED ACTION

Election/Restrictions

1. Restriction is required under 35 U.S.C. 121 and 372.

This application contains the following inventions or groups of inventions which are not so linked as to form a single general inventive concept under PCT Rule 13.1.

In accordance with 37 CFR 1.499, applicant is required, in reply to this action, to elect a single invention to which the claims must be restricted.

Group I, claim(s) 1-13, 16, 17, 18 and 21, drawn to a method of identifying a drug candidate capable of removing fibril or aggregate of peptide or protein.

Group II, claim(s) 14, 15 and 20, drawn to a treatment method and device of a disease caused by aggregation of peptide or protein.

The inventions listed as Groups I and II do not relate to a single general inventive concept under PCT Rule 13.1 because, under PCT Rule 13.2, they lack the same or corresponding special technical features for the following reasons: The common technical features for group I-II are aggregated peptide or protein as claimed in Claims 1 and 14. This technical feature is known in the art, e.g. Ono (Journal of Neurochemistry, 2003, IDS) teaches aggregated peptide or protein. Thus, the feature as claimed in claim 1 and 14 is well known in the art, and therefore is not a special technical feature. This makes the restriction requirement proper.

2. A telephone call was made to Lisa M. Hemmendinger on 04/04/2009 to request an oral election to the above restriction requirement, but did not result in an election being made.

3. Applicant is reminded that upon the cancellation of claims to a non-elected invention, the inventorship must be amended in compliance with 37 CFR 1.48(b) if one or more of the currently named inventors is no longer an inventor of at least one claim remaining in the application. Any amendment of inventorship must be accompanied by a request under 37 CFR 1.48(b) and by the fee required under 37 CFR 1.17(i).
